Dear Mr. + Mrs. Weisberg

I am so thoroughly appalled by our justice system. In watching the Menendez Bros. trial on Court TV, plus other trials I've watched, I wonder how anyone could get a fair hearing. Lawyers argue over the evidence, pro + con, and the juries never hear crucial facts in the cases. But, at least, most accused people do get a hearing.

I'm anxious to recieve your book, although that isn't my reason for writing to you. I feel so grieved that the JFK matter has not been resolved. I've read so many books on the subject, my favorites being "High Treason" + "Conspiracy"; the dumbest one, "Fatal Error." Anthony Summers' suggestion that J.D. Tippet was shot by someone in his love triangle was interesting. I don't know if it was followed up or hushed up.

This is a strong statement, but I feel that J. Edgar Hoover was a national disgrace. The U.S. has a great government, but ran by some very unscrupulous people.

I don't understand how these same peaples have managed to fool the news media. Maybe if the Marine Corps had labled their target practices "good hit" + "poor shot" that would have helped, instead of "marksman" + "sharp-shooters."

I'm inclined to believe that the Mafia supplied the hit, working with the FBI - CIA, who supplied the cover-up. LTBJ, as a witness to the killing, knew he had to agree or he might not survive. I do think Ruby was innoculated with live cancer cells, the same as Martha Mitchell was.

After seeing Mr. Weisberg on Bill Kurtis' TV show, and the picture of your lovely home on it's own "Grassy Knoll" I feel quite at ease writing to you. It's so frustrating to want to know + be so thwarted. Maybe we should all just go over to George Will's camp.

My best Wishes

June Christensen
